

LMG, Orlando Florida

### **Citrix Deployment**

#### **Customer Challenges:**

- Deployment of new accounting software
- Centralized management of LAN/WAN
- Remote access
- Internet security
- Upgrading existing LAN infrastructure
- Establishing WAN infrastructure
- Time sensitive
- Budget sensitive

#### **Bayshore Recommendations:**

- Deploy the accounting software on a Citrix Metaframe platform for increased performance, centralized management and rapid deployment
- Utilize CISCO routers at all remote sites with the option of VOIP in the future -- offering exceptional expandability
- Recommend Checkpoint firewall for internet security
- Upgrade to the latest HP Netserver technology in a racked environment "server farm"
- Coordinate the TELCO migration at remote sites
- Provide Bayshore senior engineers for 3 weeks to manage and complete the project on budget, on time, and in a production environment
- Deploy Win Terms when appropriate

#### **Project Solution Summary:**

The network administrator is now managing a 150-node network by himself. The ease of management, deployment of applications, and security issues are controlled centrally. LMG has maximized their investment in technology by choosing a Citrix solution that is scalable into the future. Thus, allowing them to use capital for projects that will significantly impact their "Bottom Line" well into the future.

***"LMG now has a cost-effective technology solution that enables our employees improved access to company information thanks to HP, Citrix and Bayshore Technologies. Bayshore performed the install efficiently and effectively, saving us time and valuable resources and proved to be a top-notch solution provider."***

Ross Smith, Director of IT Services  
LMG
